NOTICE

**MARCO ISLAND
WATER CUSTOMERS**

TEMPORARY MODIFICATION TO THE DISINFECTION PROCEDURES

On September 1, 2015, the Marco Island Water and Sewer Department (MIWS) will be performing the annual water distribution system purge as recommended by the State of Florida Department of Environmental Protection for water utilities using chloramines as their primary disinfectant. From September 1, 2015 through September 30, 2015, MIWSD will be temporarily changing the disinfection process for the potable (drinking) water supply for the Marco Island Drinking Water Service Area. During this thirty day period, the water will be disinfected with free chlorine rather than chlorine combined with ammonia (chloramines).

This temporary change in disinfection does not cause adverse health effects. However, during this period customers may experience a change in the taste, odor and/or color of the water due to the change in treatment.

Customers on Kidney Dialysis who use a proportioning machine to prepare dialysate at home are advised to contact their physician or equipment supplier to obtain the appropriate steps to accommodate the change in water disinfection and to install the proper filtering devices, if needed.

Customers who have a fish tank(s) or aquatic species are advised to contact the local pet store to ensure proper pretreatment of the water before adding or changing the water in the tank to avoid any problems associated with chlorine.

MIWS will be performing a flush of the system in conjunction with this change in water treatment. Water customers should be aware that they might experience short-term changes to their water quality during flushing, including cloudy or discolored water. While this water is safe to drink, there is a possibility that it may possibly stain clothes that are laundered. Customers are advised to flush any cloudy or discolored water that may enter their plumbing by running a faucet for several minutes.

Customers who may have further questions concerning this change in disinfection should call Scott Henriksson at the Marco Island North Water Treatment Plant, office - 239-389-3972 or cell number - 239-825-5243.
