Re: Flagpole Rqmnts CC:

Urgent  For Review  Please Comment  Please Reply  Please Recycle

● Comments:

Dear Sir,

Here are the requirements for installing a flagpole in the yard of your single residence.

Flagpoles 15 feet high or less do not require a permit or engineering.

Flagpoles over 15 feet high require a permit and engineering.

(Manufacturer installation specifications may be submitted in lieu of engineering)

Flagpoles over 25 feet high are not permitted on single-family residential lots.

Flagpoles must be placed 25 feet back from the front & rear property lines, but there is some discussion in place regarding the location of flagpoles, so if you can submit a copy of your survey showing the desired location of the flagpole our zoning staff will try to work with your request.

I have included the permit application and owner builder form with this fax.

If you need to get in touch with me my number is 389-5059.

Thank you,

Lee
