Re: French Drain Repairs

Urgent **For Review** **Please Comment** **Please Reply** **Please Recycle**

•Comments:

New or replenished French drains that are not part of a seawall permit must be permitted and inspected by the City of Marco Island Building Department. French drains will now require two (2) inspections. The **first 733 French Drain** inspection will be called before the stone is placed. The **second 733 French Drain** inspection will be called for the final inspection.

Filter Fabric or other approved method to prevent material seepage into the canal will be installed.

All installers shall be licensed, insured and registered with the City of Marco Island.
