

NOTICE TO CONTRACTORS

Date: June 2, 2010

Subject: Seawall Installation

As you are aware, the Marco Island City Council has voted to pass the new seawall ordinance #10-02. The basic Changes are concrete testing and encapsulating old concrete seawalls with vinyl.

I suggest you obtain a copy of the new ordinance and technical specifications, as there are strict parameters to allow encapsulation.

Concrete testing is to be done by a certified testing company. All testing results are to be provided to the City after final inspection and prior to certificate of completion.

You must also provide a stamped letter from your engineer stating the inspection dates and certification of seawall installation. Please see Notice to Contractors dated May 11, 2010 on construction of seawalls and inspections.

The effective date of these requirements on permits applied for will be July 1, 2010.

Please do not hesitate to contact Bruce Yakola at 389-5057 for assistance during this transition.

Thank you,

Robert Mahar
